4. First aid measures

4.1. Description of first aid measures

General	In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.
Inhalation	Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious place in the recovery position and obtain immediate medical attention. Give nothing by mouth.
Eyes	Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention.
Skin	Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser.
Ingestion	If swallowed obtain immediate medical attention. Keep at rest. Do NOT induce vomiting.

4.2. Most important symptoms and effects, both acute and delayed

Overview	Eye and Skin Contact: Irritant characteristic of mild organic acids. Inhalation: None known for liquid product. Comments: If exposure and symptoms occur seek immediate medical attention.
	See section 2 for further details.
Eyes	Causes serious eye damage.
Skin	Causes severe skin burns and eye damage.

Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

6.3. Methods and material for containment and cleaning up

Precautions in Case of Spill: Absorb spill with inert materials then place in a chemical waste container, neutralize with soda ash or lime. For large spills, dike and isolate spill for later disposal, neutralize with soda ash or lime.

Always follow local, state and federal government regulations. Immediate cleanup of any spill is recommended.

Disposal method: Dispose of in accordance with local, county, state and federal regulations.

Contain, dilute cautiously with water, and neutralize with soda ash or lime.

7. Handling and storage

Non-toxic, non-volatile, safe and biodegradable product, normal handling and storing precautions.

See section 2 for further details. - [Prevention]:

7.2. Conditions for safe storage, including any incompatibilities

Handle containers carefully to prevent damage and spillage.

Incompatible materials: Diazonium salts, diisopropyl peroxydicarbonate, oxidizers, bromide and chlorine trifluorides, fluorine perchlorate, mercurous chloride, potassium chlorates, metallic salts, tartaric and other acids, alkali metals and caustics. This material may be extremely hazardous in contact with chlorates and nitrates. Contact with hypochlorites (eg. Chlorine bleach, sulfides or cyanides) will liberate toxic gases. Contact with alkaline materials (eg, aqua ammonia) will generate heat.

See section 2 for further details. - [Storage]:

7.3. Specific end use(s)

No data available.

Skin	Chemical resistant clothing such as coveralls/apron and boots should be worn. Wear work gloves when handling.
Engineering Controls	Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.
Other Work Practices	Fresh water supply should be available. Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

See section 2 for further details. - [Prevention]:
