5. Fire-fighting measures

5.1. Extinguishing media

Use waterfog, "alcohol" foam, dry chemical or CO2.

5.2. Special hazards arising from the substance or mixture

Oil soaked rags can cause spontaneous combustion if not handled properly. Wash rags with soap and water before disposal.

Hazardous decomposition: Combustion produces carbon monoxide, carbon dioxide, and thick smoke.

5.3. Advice for fire-fighters

Treat as oil fire. Rags soaked with any solvent present a fire hazard and should always be stored in ul listed or factory mutual approved, covered containers. Improperly stored rags can create conditions that lead to oxidations. Oxidation, under certain conditions can lead to spontaneous combustion. This product contains antioxidants to retard oxidation.

ERG Guide No. ----

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Put on appropriate personal protective equipment (see section 8).

Oil soaked rags can cause spontaneous combustion if not handled properly. Wash rags with soap and water before disposal.

6.2. Environmental precautions

Do not allow spills to enter drains or waterways.

Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

6.3. Methods and material for containment and cleaning up

Oil soaked rags can cause spontaneous combustion if not handled properly. Wash rags with soap and water before disposal.

Precautions in case of spill: Dike and recover for intended use. Mop up remainder with absorbant materials. Prevent from entering sewers, storm drains, natural waterways or any unauthorized drainage systems. Immediate cleanup of any spill is recommended.

Disposal method: Dispose of in accordance with local, county, state and federal regulations.
